ABOUT ME

Full-stack developer and recent BS Information Technology graduate, co-author of an award-winning, SPIE-published CNN-based rice grain purity detection system presented at ICMIP 2026 in Sapporo, Japan. Proficient in React.js, Next.js, TypeScript, Node.js, Express.js, Laravel, Python, and MySQL, with hands-on experience building responsive web and mobile applications, RESTful APIs, and database-driven systems. Comfortable integrating AI-assisted workflows (Claude, ChatGPT, GitHub Copilot) into day-to-day development.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, React Native, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Laravel, Python, Flask, RESTful APIs

Database: MySQL, Supabase, Firebase

AI / Tools: TensorFlow, ChatGPT, Claude, GitHub Copilot, Git, GitHub, Postman, Vercel, Render, VS Code

PROJECTS

Daily Fade — Barbershop Booking & Management System2026 (Ongoing)

Laravel · React · TypeScript · Supabase · Vercel · Render

- Developing a full-stack barbershop booking and management platform covering appointments, services, barbers, customers, payments, schedules, notifications, reports, and settings, with separate customer, admin, and barber-facing portals.
- Built a booking engine with real-time slot calculation and double-booking prevention logic to keep barber schedules conflict-free.
- Designed and shipped a custom design token system for a consistent dark, gold-accented admin SaaS interface across all admin pages.
- Built RESTful APIs in Laravel and responsive React/TypeScript interfaces for both customer booking flows and admin management workflows.
- Deployed frontend on Vercel and backend on Render, with Supabase handling database management.

RiceSure — Award-Winning & Published Research Project2026

React Native (Expo) · Flask · TensorFlow · Python · MobileNetV2

- Co-developed an AI-powered mobile application for rice grain purity analysis using image-based classification and a MobileNetV2-based CNN, achieving 98% peak classification accuracy under optimized training conditions.
- Built and integrated RESTful APIs connecting the React Native mobile application with the Flask backend, including image upload and prediction-result functionality.
- Contributed to integrating the trained CNN model into a mobile-accessible application evaluated through a user acceptance study (UTAUT framework).
- Published in the Proceedings of SPIE, Volume 14298 (2026), Eleventh International Conference on Multimedia and Image Processing (ICMIP 2026), Sapporo, Japan. DOI: [10.1117/12.3119413](https://doi.org/10.1117/12.3119413)
- 2nd Runner-Up, SDG 2 – Zero Hunger Category, TechnoFair 2026; 2nd Best Research Paper, Center for Research and Development Conversazione 2026.

PZAM Cups Online Ordering System2024

React.js · Node.js · Express.js · MySQL · PayMongo

- Developed a full-stack e-commerce application for online cup ordering, handling the full purchase flow from browsing to checkout.
- Implemented authentication, user management, shopping cart, and order management functionality.
- Integrated PayMongo for online payments via GCash and other supported payment methods, and built a responsive interface optimized for desktop and mobile.

EXPERIENCE

IT Intern — SPLACE BPO2026

- Provided technical support and hardware/software troubleshooting, including OS installation, configuration, and system maintenance for end users.
- Assisted with basic networking tasks and day-to-day system monitoring.

EDUCATION

Bachelor of Science in Information Technology — Holy Cross of Davao College2022–2026

Relevant Coursework: Software Development, Database Management, Systems Analysis & Design, Networking, Web Technologies
